LAP Lambert Academic Publishing. Paperback. Book Condition: New. Paperback. 56 pages. Dimensions: 8.7in. x 5.9in. x 0.1in. Water is a valuable product, which should be used carefully. Increased global consumption of water has become a growing concern from a few decades, which has increased the demand of water recycling and reuse of waste-water by treating it with appropriate methods and technologies to meet the needs and aspirations of future generation. The reuse and recycling of laundry waste-water was carried out at lab scale. In this study, two random laundries were selected. A survey of PU and LCWU hostel laundries was made to characterize the laundry waste-water. A low cost sand and gravel filter was designed to reuse the laundry waste-water for the first rinse. Treated water was considered as low-grade water, which was found suitable for the first rinse of clothes in both laundries. By the uses of this low-grade water, 0. 7m³ and 0. 8m³ of fresh water from PU and LCWU laundries could be save daily. This item ships from multiple locations. Your book may arrive from Roseburg,OR, La Vergne,TN. Paperback.
