Imagine that after going 2 steps right and then 7 left, I find myself 10 steps to the left of the origin. Where was I I retrace my steps, going from 10 left, 7 steps right, and then 2 left, and I find myself 5 steps left from the origin. Or again, I notice that I have come upon the whole 5 steps left from the starting point, and retracing these, I get as before a point 5 steps left from the origin. In symbols: $-10 - (2 - 7) - 10 - 2 - 7 - 5$, and $-10 - (2 - 7) - 10 - (-5) - 10 - 5 - 5$ an illustration of association and sign-reversal. Of the latter, here are others: less of westing is more of easting; less of spent is more of saved; to lighten ones burdens is to add to ones strength; taking away cold is making warm. If I twice repeat three steps to the right from the origin, I go 6 steps to the right. If I twice repeat 3 steps to the left, I go 6 steps to the left. If I twice retrace 3 steps to the right, I go 6 steps left. If I twice retrace 3 steps...
