Excerpt: . . . identified as the OTC derivatives that were most similar to CDS in terms of the risks and challenges that they presented. The main risks from CDS include counterparty credit risk, operational Overview of the Risks and risk, concentration risk, and jump-to-default risk. In simple terms, Challenges Posed by CDS counterparty credit risk is the risk to each party in an OTC derivatives contract that the other party will not fulfill the obligations of the contract. In addition to potentially not receiving contractual payments, a purchaser of CDS whose counterparty fails would suddenly be left without protection and could either have to replace the CDS contract at current, higher market values or go without protection. Banks and other financial institutions that have large derivatives exposures use a variety of techniques to limit, forecast, and manage their counterparty risk, including margin and collateral posting requirements. However, regulators, market participants, and observers identified several challenges in managing CDS counterparty credit risk. First, although margin and collateral posting serve as a primary means...
