

## Cogent Science in Context: The Science Wars, Argumentation Theory, and Habermas

By William Rehg

MIT Press Ltd, United States, 2011. Paperback. Book Condition: New. 218 x 145 mm. Language: English . Brand New Book. Recent years have seen a series of intense, increasingly acrimonious debates over the status and legitimacy of the natural sciences. These science wars take place in the public arena--with current battles over evolution and global warming--and in academia, where assumptions about scientific objectivity have been called into question. Given these hostilities, what makes a scientific claim merit our consideration? In Cogent Science in Context, William Rehg examines what makes scientific arguments cogent--that is, strong and convincing--and how we should assess that cogency. Drawing on the tools of argumentation theory, Rehg proposes a multidimensional, context-sensitive framework both for understanding the cogency of scientific arguments and for conducting cooperative interdisciplinary assessments of the cogency of actual scientific arguments. Rehg closely examines Jurgen Habermas's argumentation theory and its implications for understanding cogency, applying it to a case from high-energy physics. A series of problems, however, beset Habermas's approach. In response, Rehg outlines his own critical contextualist approach, which uses argumentation-theory categories in a new and more context-sensitive way inspired by ethnography of science.
