## Design and evaluation of jointed plain concrete pavement with fiber reinforced polymer dowels

By -

No binding. Book Condition: New. This item is printed on demand. Original publisher: McLean, Va. : U. S. Dept. of Transportation, Federal Highway Administration, Research, Development, and Technology, Turner-Fairbank Highway Research Center, 2009 OCLC Number: (OCoLC)729724599 Subject: Fiber-reinforced plastics -- Testing. Excerpt: . . . CHAPTER 1. INTRODUCTION GENERAL REMARKS U. S. highways and roads made of jointed plain concrete pavement ( JPCP ) use load transfer devices, called dowels, across joints of a series of contiguous concrete slabs. Joints allow the movement and deformation of pavement to occur under mechanical loading and thermal variations. Joints may either be parallel to traffic ( longitudinal joints ) or perpendicular to traffic ( transverse joints ). Typical problems of jointed concrete pavement without an effective load-transfer device include faulting, pumping, and corner breaks. As the American Association of State Highway and Transportation Officials ( AASHTO ) reported, pavement joints supported with dowels have a longer service life than joints without ( 1 ) dowels. Over time, traffic traveling over a joint may crush the concrete surrounding the dowel bar and cause voids due to excessive bearing stresses between the dowel and surrounding concrete. Concrete crushing may take place due to stress concentration...

### Reviews

*A fresh e book with an all new viewpoint. It can be rally exciting throgh studying period of time. You will like the way the writer write this publication.*

-- **Tania Cormier**

*An extremely wonderful pdf with perfect and lucid information. Better then never, though i am quite late in start reading this one. I realized this publication from my dad and i recommended this publication to understand.*
