Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1915 Excerpt: .mentioned by Dr. Aitken in the April number of this magazine. It brings the time of nearest approach to the Sun forward to July 17th. On that date the comet will be just a little more than unit distance (the mean distance of the Earth from the Sun) from the Sun. Its motion is in a plane inclined 540 to that of the ecliptic. The nearest approach to the Earth will be June 5th, when it will be distant from us a little less than forty million miles. On that date it will attain its maximum brilliancy, 205 times that at discovery. It will then probably be of about the second magnitude. At that time it will be 680 south of the equator, so that it cannot be seen from this latitude. The orbit of this comet is somewhat similar to that of the second comet of the year 1748. Computations show, however, that the two comets are probably not identical. R. T. Crawford. Berkeley Astronomical Department, May 15, 1915. Companions To Mellish s Comet. A telegram from the Harvard College Observatory was received on May 13th, announcing the discovery by Professor Barnard, of the Yerkes Observatory, of two companions to Mellish s Comet, on May 12th. One of these was described as conspicuous, 28 from the nucleus in position-angle 2850, the other as faint, intermediate in distance in the same line. Unfavorable weather conditions had prevented observations of this comet here for the two weeks...
